## OBJECTIVE

Software developer with a strong interest in backend development, full-stack web applications, and e-commerce solutions. Hard-working, energetic, personable, and technical-minded individual. Currently pursuing a Bachelor's degree in Computer Application while gaining practical experience in web development and API integration. I also possess:

- Experience in full-stack development using MERN Stack (MongoDB, Express.js, React.js, Node.js)
- Excellent task management with ability to handle multiple projects simultaneously
- Proficiency in RESTful API development, authentication systems, and secure password management
- Strong foundation in database management using MongoDB and MySQL
- Experience with email integration using Nodemailer and token-based authentication

## EDUCATION

**New Summit College** – Bachelor of Computer Application (BCA), Currently Pursuing  
Feb 2022 to Present, Kathmandu

**NASA College** – +2 Management (Computer Science)  
May 2020 to May 2022, Kathmandu

## CERTIFICATIONS

- MERN Stack Development – Broadwayinfosys

## EXPERIENCE

**Aariyana Tech Solutions**, Bhaktapur

Backend Intern (Aug 2025 to Oct 2025)

- Developed and maintained backend services using Node.js and Express.js
- Collaborated with development team to implement RESTful APIs and integrate with frontend applications
- Worked with MongoDB for database design and management
- Participated in code reviews and followed best practices for backend development
- Gained hands-on experience in real-world software development lifecycle

## PROJECTS

### Restaurant Table Management System ([grillsandgather.vercel.app](https://grillsandgather.vercel.app))

- Developed a comprehensive Restaurant Table Management System allowing users to view available tables, select preferred seating, and make online reservations
- Implemented an admin dashboard for managing and processing reservation requests with approve/reject functionality
- Designed system architecture to improve table utilization and reduce manual booking effort
- Technologies: MongoDB, Express.js, React.js, Node.js (MERN Stack)

### Hike Gear Nepal ([github.com/SidharthaSahani/Hike-Gear-Nepal](https://github.com/SidharthaSahani/Hike-Gear-Nepal))

- Created a web-based platform serving as a one-stop solution for trekking equipment needs in Nepal
- Developed functionality for both new and second-hand product listings with rental options to increase accessibility and affordability
- Implemented frontend using HTML, CSS, and JavaScript with PHP backend and MySQL database
- Designed user-friendly interface to enhance customer experience for trekkers and hikers

## SKILLS

- **Frontend Development:** HTML, CSS, JavaScript, React.js, Next.js
- **Backend Development:** Node.js, Express.js, PHP, ASP.NET Core
- **Databases:** MongoDB (Mongoose), MySQL
- **Programming Languages:** JavaScript, C#, Java
- **Tools & Technologies:** API Testing (Postman), Git/GitHub, MERN Stack, Nodemailer
- **API & Data:** RESTful API Development, JSON, Token-based Authentication
- **Other:** Networking Basics, Web Development, Full-Stack Development, E-commerce Solutions

## LANGUAGES

- Nepali (Native)
- English (Fluent)
